

INSIDER

ASSESSMENT SYSTEM

INSIDER IS A GREAT TOOL FOR COACHES AND CONSULTANTS WISHING TO PROVIDE AN EASY, SOPHISTICATED WAY TO CAPTURE DATA ONLINE AND PRODUCE REPORTS

Many of us use self-assessment questionnaires as part of training, coaching, or other development activities. Often we use off-the-shelf tools, but where a specific area or application needs to be measured - or for a tailored approach - it can be more appropriate to design and use our own assessments.

InsDer is our flexible self-assessment system, allowing us to create an on-line version of *your* self-assessment questionnaire and then host and manage it for you.

Taking your questions and rating scale, the online questionnaire can be branded with client logos, and reports are tailored to meet your needs. Choose from one of our styles or we'll do our best to re-create your existing design.

InsDer provides an easy way to administer and score self-assessments, sending email invitations to individuals, who then access and complete the questionnaire online. Following completion, the report can be made instantly available to the respondent, or to you as an administrator, to download depending on preference.

For team or organisational analysis, InsDer provides an option to create composite group or team reports to show any trends or group development needs.

Contact us with your specific requirements.
